

# DOCK IT station

## Public Bench/Banco Pubblico

*Design: Vladimír Ambroz – 2014*

DOCK IT station is a modular relaxation system designed for public areas, shopping galleries or large halls. The system offers not only various seating modifications but it is also a place nowadays extremely sought-after since its advantage is the possibility of recharging tablets or mobile phones as well as the Wi-Fi connection.

The system invites you to a stopover, quick relaxation, and communication. It offers great variability of both dimensions and colours. You may combine the individual elements into compositions or you may leave them placed freely. According to the requirements, the system elements may be shortened or prolonged.

Swarms of large fish or submarines as objects flown around with water have been the inspiration of this design. The objects are placed into the flow of moving visitors of the given premises. Material used is Corian®, upholstered elements / fins are equipped with electric sockets. DOCK IT may be adapted to any interior by the choice of colours, sizes, and compositions.

**Material:** DuPont™ Corian® – Glacier White and Royal Red, upholstery according to customer requirements

**Basic size:** 3000/900, 2100/900, 1100/900 mm  
(The size can be adjusted according to the project specifications.)

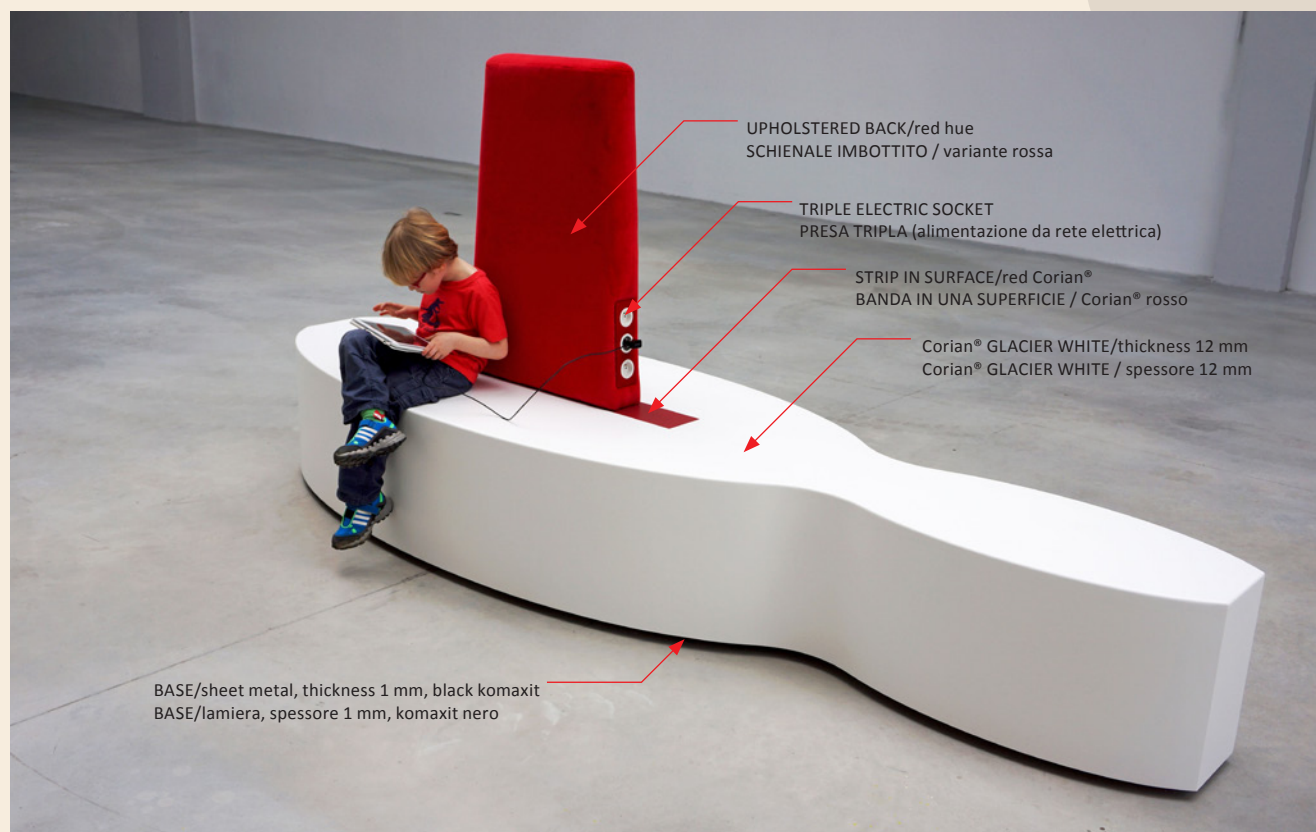

Un sistema modulare di riposo, destinato ai locali pubblici, passaggi commerciali o grandi hall. Offre non soltanto varie possibilità di seduta, ma è anche il luogo oggi frequentatissimo che permette di ricaricare tablets o cellulari e offre la connessione Wi-Fi.

Questo sistema invita a fermarvi, a riposarvi brevemente e a comunicare. Le sue dimensioni e i suoi colori sono variabili. Le singole parti possono comporsi in un insieme o possono rimanere indipendenti, raccorciate o allungate.

Gli sciami di grandi pesci o di sottomarini quali oggetti circondati d'acqua servono d'ispirazione. In questo caso sono messi nel flusso di visitatori che si muovono in questi locali. Il materiale è Corian®, l'elemento imbottito / la palma è munita di prese di corrente. DOCK IT può adattarsi a ogni interno, scegliendo colori, taglie e composizioni.

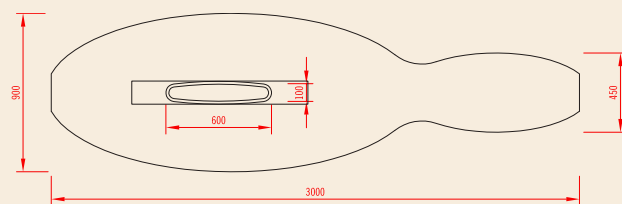

**Materiale:** DuPont™ Corian® – Glacier White e Royal Red, l'imbottitura e lo schienale a richiesta del cliente

**Le taglie di base:** 3000/900, 2100/900, 1100/900 mm  
(È possibile di modificare le dimensioni secondo il progetto.)
